

Google Classroom Guardian Report

As we have transitioned to Google Classroom, we wanted to inform you of ways you can keep up with your child's progress. The Google Classroom guardian report is a way for you to get reports weekly (or more often if you choose) and it outlines announcements, missing assignments, turned in assignments and upcoming assignments. For more information about what you expect from your Guardian Summaries, click here: <https://sway.com/D2nxFWAZHsebE6IO?ref=Link>

One area that the Google Classroom guardian report does not outline is the individual assignment grades, or the overall grade for the course. Below are ways in which you can access and keep up with your child's grades for each class if you wish to do so:

- Every Friday, your child will be bringing home a grade report for each class they are taking. This report will have the overall course grade, as well as the itemized grades for each assignment.
- If you wish to get more information regarding a specific grade for an assignment you saw on the guardian report before Friday we encourage you to:
 - Sit down with your child and log into their account with them so you can look at the grades/feedback together OR
 - Email the content teacher with the assignment name in which you would like more information.
